# A PEOPLE'S ATLAS OF NUCLEAR COLORADO

*edited by Sarah Kanouse and Shiloh Krupar*

TUESDAY, SEPTEMBER 14, 2021  
11AM - 12:30 PM EASTERN

*rsvp - <https://bit.ly/peoplesatlas>*

Join us for the public launch of "A People's Atlas of Nuclear Colorado, a digital public humanities project that documents and interprets nuclear geographies and legacies of the Cold War. The Atlas draws together background information, archival materials, accessible scholarly essays, and artist interventions into the legacies of the domestic Cold War. Grounded in the specific location of Colorado and its nuclear materials and ecologies, the Atlas allows users to explore the US nuclear complex and its many scales of operation, relational geographies, and troubling future.

Following an introduction and short demo by the editors, panelists will provide insight into their contributions. The event will conclude with discussion on further expanding on this material in educational, policy, and community settings.

## *panelists*

Stephanie Malin, Associate Professor of Sociology, Colorado State University  
Abbey Hepner, Assistant Professor of Art, Southern Illinois University, Edwardsville  
Mallery Quetawki (Zuni Pueblo), Artist-in-Residence, University of New Mexico
